Featuring a unique Power Management system to reduce our environmental impact

LapCabby

Laptop Charging & Storage Units

The LapCabby range takes laptop storage to a whole new level with its diverse product range and new features that make LapCabby the only choice in laptop charging and storage.

Incorporating innovative door locking systems and a unique 'Green' power management system, we have achieved laptop security together with high level energy efficiency. This clever design offers a contemporary look with bold, striking handles that also provide an ergonomic feel. Rubber corner bumpers give important protection not only to the unit but also the classroom, and shock absorption for the laptops. With the future in mind we have created this range to cater for laptops up to 19" and for those using mini laptops, our LapCabbyMini range is the answer.

LapCabby 32H

32 Bay Horizontal Laptop Charging Unit

Horizontal Storage

The LapCabby horizontal storage units are designed to house either 16 or 32 laptops. Each laptop is stored on an individual sliding tray for improved accessibility. A side opening door to a separate compartment allows easy access to the individual AC adapters supplied with the laptop and utilises an innovative cable storage system that keeps cables compact, neat and tidy.

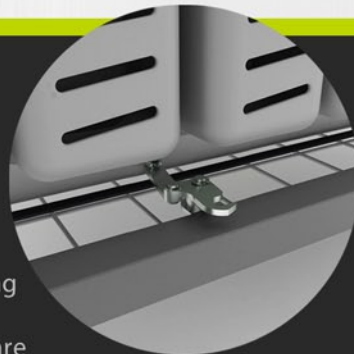

Unit Size

Laptop Compartment Size

| | Unit Size | | | Laptop Compartment Size | | | |
|--------------|-----------|--------|--------|-------------------------|-------|--------|------------|
| | Depth | Width | Height | Depth | Width | Height | Max Laptop |
| LapCabby 16H | 703mm | 857mm | 1215mm | 510mm | 368mm | 56mm | 19" |
| LapCabby 32H | 703mm | 1291mm | 1215mm | 510mm | 368mm | 56mm | 19" |

lockable Storage

With security being a key feature in the design, we have developed an effective dual point locking mechanism. With one turn of the key the doors are simultaneously locked at the top and bottom for increased security, giving you peace of mind. The dual point locks are operated from the top of the unit, which means keys are out of harms way and gone are the days of snapping keys in locks when bumped into walls.

All LapCabby models include a specifically designed and tested air venting system, keeping laptops cool while the unit is locked and the laptops charging. Another key feature in the design, to keep the unit temperature down whilst charging, is a mesh base to maintain the security of the unit whilst increasing ventilation.

Vertical Storage

The vertical storage LapCabbys are designed to house 10, 16 or 20 laptops stored in their own individual vertical trays. Soft rubber grips cushion and protect laptops when in storage and large L-shaped doors and sliding shelves provide easy, clear access to laptop storage compartments. Similar to the horizontal storage a separate compartment with rear facing doors allows easy access to the individual AC adapters supplied with the laptop and utilises an innovative cable storage system that keeps cables compact, neat and tidy.

Safety Features

To prevent children from gaining access to the wiring and electricity, there are separate electrical compartments that can't be accessed directly from the main laptop storage area. The separate electrical compartments can only be accessed by hidden door releases making it difficult for children to gain entry.

Safety certificate with electrical components rated to the following British and European standards: EN 61000-6-1, EN 61000-6-3, EN 61000-3-2 and EN 61000-3-3:1995. Electrical Safety to BS EN 60730-1:2001 and BS EN 60730-2-1:1997

Individual laptop storage boxes to keep your laptops protected from knocks and scrapes (shown here carrying two mini-laptops) are available as an optional extra on regular LapCabby Vertical Storage units. Boxes are standard on all LapCabby Mini's.

energy saving power management

Featured on all LapCabbys is our brand new energy saving power management system. With adjustable 7-day timer, laptop charging can utilise Economy 7 power but can also be overridden for daytime charging. Another unique feature is the sequential switching facility which will turn one section of laptops on at a time to avoid your schools circuit breakers being overloaded when the power is switched on. An auxiliary powersource for the use of projectors / Wifi / printers is available as an optional extra.

LapCabbyMini Storage

New to the LapCabby range are the LapCabbyMini's, which have been designed specifically for either 20, 32 or 40 mini laptops. The units also include laptop storage boxes for greater protection against knocks and scrapes.

Supplied with each LapCabbyMini are unique energy saving dual cables which connect to the AC adapters that are supplied with the laptops. These cables will enable two mini laptops to charge using the same 3-pin plug.

LapCabby
optional extras

- Storage boxes also available for vertical storage units.
- Double power socket for the use of projectors / Wifi / printers etc.
- Safety release on main power cable.
- Secure wall bracket to secure your LapCabby to the wall.

All LapCabbys have a
2 year warranty
guaranteed
